MEETING AGENDA

Prepared by: Ysabel Dungca
8th of October 2020

Meeting #13

AGENDA

A RECAP OF EVERYONE'S PROGRESS

- Campbell was unable to attend this meeting due to technological issues.
- Belle continued working on the staff view portion of the UI prototype. Tung and Belle agreed to continue doing some edits on the prototype later.
- Tom made a skeleton database using SQLite, containing the base of the database that would house all of the legal information pertinent to our application.
- Ben continued completing more sections of the report, particularly the "How has it progressed?" section, including appendices to be referenced, and will hope to do more of the sections that comprise the "Detailed description" area.
- The other members did small bits of the report where they could, but we were all quite busy with assessments, so we were understanding that it may take some time to finish the loose ends of this assessment.
- We spent some time discussing the "Timeframe" section.
- We all committed to finishing the majority of content before next week so we can then start updating our Github fork and planning the group presentation earnestly after submission of the PDF report and the Github repository.
